EDUCATION

National Institute of Technology, Karnataka (NITK)

Bachelor of Technology - Electrical and Electronics Engineering - **CGPA : 9.18/10**

Minor in Computer Science - **CGPA : 8.8/10**

Surathkal, Karnataka

Nov 2022 – Present

EXPERIENCE

Oracle India

Server Technology Intern

May 2025 – July 2025

Bengaluru, India

- Analyzed the **HTTP/2** implementation in **Oracle HTTP Server (OHS)** to identify missing protocol compliance with **RFC 7540**.
- Implemented logic to handle invalid connection prefaces by sending a **GOAWAY** frame and gracefully closing connections.
- Contributed to **production-level code**, enhancing the protocol robustness and reliability of **OHS**.

PROJECTS

DeFinite1: Non-Custodial DeFi Portfolio Manager | | NextJS, TypeScript, Tailwind CSS, Wagmi Aug 2025

- Developed a multi-chain non-custodial treasury dashboard enabling **DAOs**, startups and DeFi users to monitor balances, execute optimized swaps and perform cross-chain transfers across **12+ EVM** networks.
- Integrated **linch** Fusion, **Fusion+**, **Swap**, **Portfolio** and **Balance** APIs to deliver swaps with **MEV** protection, cross-chain automation and real-time portfolio insights under **<400 ms** latency.
- Built a full-stack solution using **NextJS**, ensuring seamless trade simulations, portfolio aggregation and risk-mitigated treasury operations.

CodeSaviour: A Codeforces Problem Search Application | | React, Recoil, Tailwind CSS, Vercel June 2024

- Developed a web application that allows users to search Codeforces problems by name, with features like alphabetical sorting and a **Responsive UI**.
- Utilized **Recoil** for efficient state management and deployed a **serverless function** on **Vercel** to resolve **CORS** issues, ensuring smooth API interactions.
- Achieved over **300+** unique visitors and **600+** page views, demonstrating user engagement and the application's value to the competitive programming community.

AFK: Gesture-Based Game Control System | | OpenCV, Mediapipe, Python, Pynput

Jan 2024

- Engineered a **real-time** hand gesture recognition system using **OpenCV** and **Mediapipe**, mapping finger gestures to game controls for an immersive hands-free gaming experience.
- Integrated **Pynput** to simulate keyboard inputs, enabling seamless interaction between the gesture system and the game with improved accuracy and performance.
- Enhanced robustness through extensive testing, ensuring reliable functionality and achieving high user engagement with intuitive gameplay.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Solidity, Python, HTML/CSS

Frameworks: NextJS, ReactJS, NodeJS, Express, Flask, OpenCV, WebRTC, Socket.io, Tailwind CSS

Developer Tools: Git, VS Code, Google Colab, PostMan, MySQL, MongoDB, Foundry, Hardhat, MATLAB

Relevant Courses: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- Achieved 1st place in the Capture the Flag followed by Treasure Hunt organized by **IEEE, NITK**.
- Secured 2nd place in the Capture the Flag competition organized by **IE, NITK**.
- Earned 3rd place in the Dare to Design competition by **IET, NITK**.

EXTRACURRICULAR

Association for Computing Machinery(ACM), NITK

- Actively involved in club sessions and technical initiatives; mentoring juniors on technical projects and internship preparation.

FilmSoc - Literacy, Stage and Debating Society(LSD) , NITK

- Contributing as a cinematographer and video editor at LSD FilmSoc, creating short films.
